Literacy Tips

Using a few simple strategies will make a significant difference in helping your children develop into good writers.

- **Write Notes!**

A personal note – just a few words tucked in a lunch box or left under a pillow can be a wonderful surprise. If you're lucky, you'll get a response.

Writing doesn't always have to be **BIG**.

School Assemblies:

We have various celebrations here at school during our school assemblies. These vary from month to month and include such events as:

- Student Recognition Assemblies
- Celebrating Various Cultural Events
- School Performances/Choir Presentations

Math Tips

Ideas parents can use at home to help their children develop their math skills.

- **Estimate everything!** Estimate the number of steps from your door to the edge of the yard; then walk with your child to count how many steps there are!
- Estimate how many litres of milk your family will need for the week. At the end of the week, count up the number of litres you actually used.

Healthy Living Tips:

**Watermelon makes a great snack.
Just wash cut and eat.**

Storing tips:

- Whole and cut melons should be stored in the refrigerator or in a cool part of the house. Wrap the cut end with plastic wrap and use within 3-5 days.
- Cut up fresh watermelon and place in a container for a quick snack.
